

## Quartz Disclaimer

Quartz is a natural quartz surface made by an optimal fusion of more than 90% quartz and resin materials. Quartz is naturally beautiful yet incredibly durable. Treated and pressed, natural quartz stone is one of nature's hardest minerals.

Quartz countertops combine sleek, contemporary styling with demonstrated strength and performance. It is scratch-resistant, stain-resistant, and is offered in an array of modern colors. Backed by a Residential Lifetime Warranty, Quartz extreme durability makes it ideal for today's kitchen and bathroom surfaces.

Quartz does not require sealing, re-polishing or reconditioning. Keeping your Quartz countertop clean is easy. Simply wipe down with warm water and a mild detergent. It is 99.93% solid and resist stains from coffee, tea, wine, grape juice, food coloring, nail polish and many other agents that permanently stain or ruin more vulnerable countertop surfaces.

Quartz's smooth and impervious surface is unsuitable for bacteria and microorganism to harbor and grow. If safety and hygiene are a part of your countertop purchasing decision, Quartz is the perfect choice for your kitchen.

Please note that Quartz slabs are only 120" X 55", which is smaller than most natural stone slabs. Therefore, additional seams may be required in your kitchen, or in your island. Seam placement is decided by the granite fabrication company, based on the layout of each floorplan.
